Career Objective:

Post Graduate Diploma in Advanced Computing (PG-DAC) graduate from CDAC with a Bachelor's degree in Computer Science Engineering with hands-on experience in designing and developing full-stack web applications, backend services, and RESTful APIs through internships and real-world projects. Strong foundation in software engineering principles, object-oriented design, data structures, and modern application development. Skilled at building scalable, secure, and maintainable software solutions while effectively collaborating in agile development environments and quickly adapting to new technologies.

Technical Skills:

Programming Languages: Java | JavaScript | C++ | C# | SQL

Backend Development: Spring Boot | Spring Framework | Spring MVC | Spring Security | Hibernate (JPA) | ASP.NET Core | Entity Framework Core | [Node.js](#), [Express.js](#) | RESTful API Development | Microservices Architecture | JWT Authentication

Frontend Development: [React.js](#) | Redux Toolkit | React Router DOM | HTML5 | CSS3 | Tailwind CSS | Bootstrap

Database Technologies: Oracle SQL | PL/SQL | MySQL | MongoDB.

Cloud, DevOps & Deployment: Docker | Kubernetes | Jenkins | Microsoft Azure | Git | GitHub | Maven.

Testing & Quality Assurance: Selenium WebDriver | Automated UI Testing | JUnit | Mockito | Postman | Swagger

Software Engineering: Data Structures & Algorithms | Object-Oriented Programming | Design Patterns | Database Management Systems | Operating Systems | Computer Networks | Software Engineering Agile Development Methodologies

Education:

Bachelor of Engineering (B.E) in Computer Science & Engineering

Trinity academy of engineering | Savitribai Phule Pune University – 2025 | CGPA: 6.75/10

Post Graduate Diploma in Advanced Computing (PG-DAC)

Centre for Development of Advanced Computing (CDAC) | 2026

Experience:

1.Web Development Intern - wisdom sprouts - 3 month

Developed and maintained responsive web applications. Assisted in backend development and database integration. Fixed bugs and improved application functionality.

2.Data Intern - Weekday(YC W21) - 1 year and 2 months

Performed data entry and maintained accurate records. Assisted in candidate sourcing and onboarding activities. Supported day-to-day operational tasks.

Projects:

[Smart Healthcare Management System with AI-Powered Electronic Health Records](#)

Tech Stack: Java, Spring Boot, React.js, Microservices, Docker, Kubernetes, Jenkins, MySQL, etc

- Developed a microservices-based full-stack application using Java Spring Boot and React.js.
- Designed secure RESTful APIs with JWT authentication and role-based access control.
- Containerized services using Docker and deployed them using Kubernetes.
- Implemented CI/CD pipelines with Jenkins and integrated Redis for performance optimization.
- Deployed the application on Microsoft Azure following modern DevOps practices.

[QuickShow](#) - Full-Stack Movie Ticket Booking App

Tech Stack: React.js, Node.js, Express.js, MongoDB, JWT, TMDB API, Stripe

- Developed a responsive movie ticket booking platform using the MERN stack.
- Implemented JWT-based authentication and role-based access control.
- Designed RESTful APIs for movie booking, seat selection, and user management.
- Optimized user experience with responsive UI and efficient state management.

Stock and Bitcoin Price Prediction (Machine Learning Project)

Tech Stack: Python, Scikit-learn, Pandas, NumPy, Matplotlib

- Developed machine learning models to predict stock and cryptocurrency price trends.
 - Applied Support Vector Machine (SVM) algorithms for predictive analysis.
 - Processed and analyzed financial datasets using Pandas and NumPy.
 - Visualized prediction results using Matplotlib to support data-driven insights..
-
